# Your Name

**Senior Full Stack Engineer**

your@email.com · +00 000 000 0000 · Your City, Country · linkedin.com/in/your-handle · github.com/your-handle

## Profile

Senior full-stack engineer with 4+ years building production SaaS platforms and AI agent systems across Node.js, TypeScript, Next.js and Go. Shipped multi-tenant agent infrastructure, REST APIs and real-time product surfaces, with a testing-first practice (Unit, Integration, E2E, TDD) and zero-downtime deployments.

## Experience

Senior Full Stack Engineer — Cynergy 2024-2025

- Architected and scaled a high-performance SaaS web application, managing the full client-side lifecycle
- Engineered scalable backend systems and REST APIs with Node.js, Express.js, Knex.js and Oracle DB
- Built modern front ends with Next.js, TypeScript, React Query and Shadcn for reusable UI components
- Implemented Unit, Integration and E2E testing suites enabling zero-downtime deployments

IoT Software Engineer — Priverion 2023-2024

- Architected full-lifecycle software for IoT devices across web portals and mobile applications
- Integrated low-level camera functionality in C++ streaming into high-performance Golang services
- Optimized web portal performance, reducing latency for real-time remote device management
- Engineered firmware-to-cloud communication features improving hardware resource management

Backend Developer — The Singular Factory 2022-2023

- Designed feature extensions for an enterprise logistics platform: secure messaging, job booking, file management, AI data visualization
- Optimized a high-traffic shipping platform improving data processing and reliability for carriers and shippers
- Developed backend logic and APIs with tight security compliance for financial transactions and data reporting
- Mentored junior developers through code reviews and clean-code enforcement

Full Stack Developer — FlexFunds 2022-2023

- Developed and maintained critical features for an enterprise Admin Dashboard for financial applications
- Engineered frontend and backend solutions ensuring high availability across administrative modules
- Resolved complex system bottlenecks, significantly reducing application error rates

Full Stack Web & Mobile Developer — NeurON 2021-2021

- Led end-to-end development for multi-store delivery applications across mobile, backend and infrastructure
- Implemented real-time communication with WebSockets for live updates and synchronized order tracking
- Designed an analytical admin dashboard for multi-tenant store operations and data visualization
- Managed server deployments, maintenance and DevOps operations

## Independent Projects

factoria-agent-core 2026

- Multi-tenant agent core: one repo serving several clients, each declaring its identity, agent, tools and business rules in config/tenants/<id>.json
- ElevenLabs Conversational AI + tool layer, Supabase Postgres via Drizzle, Zod validation, white-label embed.js iframe widget

Other public repositories —

- mini-content-approval-engine (TypeScript), my-python-ci-app (Python), my-first-ci-cd (DevOps), backend-adonis (AdonisJS), api-calendar (PHP)

## Technical Skills

**Programming:** JavaScript, TypeScript, Node.js, Go, Python, PHP, C++

**Frameworks:** Next.js, React, React Native, Nest.js, ExpressJS, Angular, Vue, Ionic, Symfony, Laravel, AdonisJS, React Query, Shadcn, TanStack Query

**Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Oracle DB

**Infrastructure:** Docker, Linux, AWS Services, CI/CD

**AI:** AI Agent Development, RAG, MCP, conversational AI with tool use, Claude Code, OpenCode

**Practices:** Unit / Integration / E2E testing, TDD, SDD, Clean Code, SOLID, Architecture Patterns, Systems Design, SCRUM

## Education

Systems Engineer 2016-2022

UNEFA

## Languages

Spanish — Native · English — B2
